2. Description of Work Done

This week, I conducted initial research on the project topic and reviewed existing systems to understand the current landscape. I also searched and examined several datasets on Kaggle, then studied the collected dataset in more detail. I worked on drafting and finalizing the project proposal document, uploading the initial draft to the repository under /Misc/Draft Docs/Proposal. After receiving feedback from the professor, I modified the proposal and uploaded the feedback file to the /Documents folder. Later, I revised the proposal report for resubmission and uploaded the updated version to the /Documents folder. Finally, I continued working on Progress Report 1 and uploaded the link to the selected dataset to the repository under the /Sample Dataset folder.

3. Repo check in of implementation Completed

During this period, I checked in several documents and resources to the repository. The initial draft of the project proposal report was uploaded to /Misc/Draft Docs/Proposal. After receiving feedback from the professor, I added the feedback file to the /Documents folder. The revised version of the proposal report for resubmission was also uploaded to the /Documents folder. In addition, the link to the selected collected dataset was uploaded to the /Sample Dataset folder.
